

extension insert plate, 13, may be fabricated of cast iron, cold rolled steel, high impact plastic or any similar material. The adjustment screw retaining clip, 12A, may be a conventional c-clip, or any similar clip.

Please replace paragraph [0031] with the following amended paragraph:

5 [0031] In operation, the user connects the table saw extension wing of the power tool attachment to the table saw, either with or without the ~~table saw extension wing insert plate~~ table extension insert plate and its attached power tool components.

Please replace paragraph [0032] with the following amended paragraph:

10 [0032] If the table saw extension wing has been connected without the table saw extension wing insert plate, the ~~table saw extension wing insert plate~~ table extension insert plate, with its attached power tool assembly, is then inserted into the table saw extension wing opening.

Amendment to the Abstract

15 Please replace the Abstract with the following amended Abstract:

An adjustable power tool attachment for table saws comprises an extension table to enlarge the table saw work surface, and a power tool attached to the bottom of a drop-in plate inserted into the extension table. The power tool can be vertically adjusted to a desired position, and can be lowered below the extension table surface. The table saw and power tool can be used sequentially, and the table saw fence can be used to guide boards or other workpieces to the table saw or power tool. A dado attachment or other power tool can be used in convenient proximity to a table saw for sequential operations, without the user replacing the table saw blades with other cutting elements, or duplicating expensive equipment.
